Training nach dem Lehrmittel Kopfrechnen 00

Spezialwerte

Trigonometrie

Das musst Du wissen!

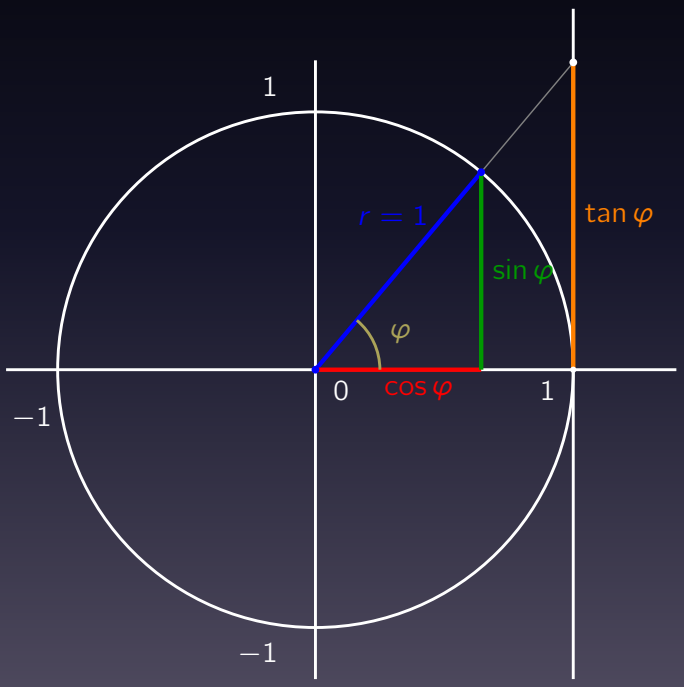

$\cos(90°) =$

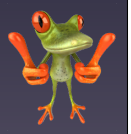

$\sin(270°) =$

$\tan(90°) =$

Einheitskreis

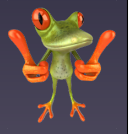

Beispiele

$$\cos(90°) =$$

$$\sin(270°) =$$

$$\tan(90°) =$$

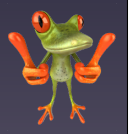

Potenzen

Das musst Du wissen!

$2^3 =$ $2^5 =$

$3^4 =$ $4^3 =$

$5^3 =$ $7^0 =$

Potenzen

a^n

$a^0 = 1$ für $a \neq 0$

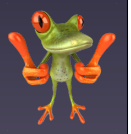

Beispiele

$2^3 =$ $2^5 =$

$3^4 =$ $4^3 =$

$5^3 =$ $7^0 =$

Potenzen negative Zehnerexponenten

Das musst Du wissen!

$10^{-1} =$

$10^{-2} =$

$10^{-3} =$

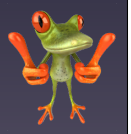

Potenzen negative Zehnerexponenten

$$10^{-n} = \frac{1}{10^n}$$

$$10^{-n} = 0.0\ldots1$$

1 an n-ter Stelle

Beispiele

$$10^{-1} =$$

$$10^{-2} =$$

$$10^{-3} =$$

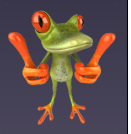

Potenzen negative Exponenten

Das musst Du wissen!

$$2^{-3} =$$

$$3^{-3} =$$

$$4^{-3} =$$

Potenzen negative Exponenten

$$a^{-n} = \frac{1}{a^n}$$

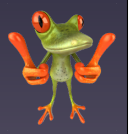

Beispiele

Das musst Du wissen!

$2^{-3} =$

$3^{-3} =$

$4^{-3} =$

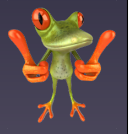

Wurzeln

Das musst Du wissen!

$\sqrt[3]{125} =$

$\sqrt[5]{32} =$

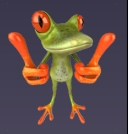

$\sqrt[4]{256} =$

Wurzeln

$$x = \sqrt[n]{a} \longleftrightarrow x^n = a$$

für $a > 0$

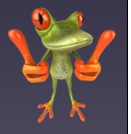

Beispiele

$$\sqrt[3]{125} =$$

$$\sqrt[5]{32} =$$

$$\sqrt[4]{256} =$$

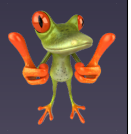

Logarithmen

Das musst Du wissen!

$\log_2 16 =$

$\log_5 \frac{1}{25} =$

$\log_7 49 =$

Logarithmen

$x = \log_a b \longleftrightarrow a^x = b$

für $a, b > 0$

Beispiele

$$\log_2 16 =$$

$$\log_5 \frac{1}{25} =$$

$$\log_7 49 =$$
