Training nach dem Lehrmittel Kopfrechnen 03

Tricks: 6.6, R

Beispiel

6.6

$$23 \cdot 4 + 23 \cdot 6 = 23 \cdot 10 = 230$$

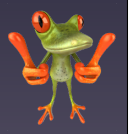

Beispiel

6.6

$23 \cdot 4 + 23 \cdot 6 = 23 \cdot 10 = 230$

6.6

$48 : 5 + 12 : 5 = 60 : 5 = 12$

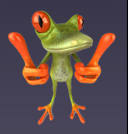

Ready?

01

$$1.3 \cdot 12 + 1.7 \cdot 12 =$$

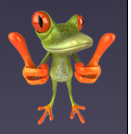

02

$$50 \cdot 32 - 30 \cdot 32 =$$

03

$$17^2 =$$

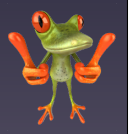

04

$$12 \cdot 7 \cdot 5 =$$

05

$$24 \cdot 7 \cdot \frac{1}{4} \cdot \frac{5}{6} =$$

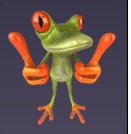

06

$$2 + 5 + 8 + 12 + 15 + 18 =$$

07

$$32 \cdot 15 - 15 \cdot 22 =$$

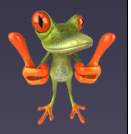

08

$$10^{-4} = (\textit{Dezimal})$$

09

$$19^2 =$$

10

$$840 : 5 : 4 =$$
